Technical Description**Purpose, Location**

The Project seeks to provide targeted support through multi-sector investment in Syunik, Armenia, addressing the impacts of recent conflicts. It will encompass various municipalities within Syunik province that have been heavily affected by the war, focusing on communities that are either hosting displaced persons or are themselves recovering from conflict-related damages. The initiative will ensure effective deployment of technical assistance and oversee the implementation and monitoring of suboperations aimed at enhancing local infrastructure, specifically in water, health, and education sectors, to bolster the community's resilience and economic recovery.

The EIB operation interventions will support government priorities in Syunik, government sector reforms and will coordinate with and complement the work of other relevant development partners undertaking related activities in Syunik province to build resilience. The government ministries and the Syunik province Governor's Office are actively working to support this agenda, with the key investment priorities being: (i) access to quality health and medical services; (ii) access to quality technical and vocational education services; and (iii) community and household access to water supplies.

The operation interventions will improve household and community access to improved social services (health, education and water supply) and livelihoods, opportunity for employment and economic activities. Displaced households and refugees will see improved access to services, better health outcomes, and enhanced livelihood opportunities.

Description

The proposed Operation in Syunik, Armenia, is designed to bolster critical social infrastructure. This includes the rehabilitation and construction of essential facilities such as Technical and Vocational Education and Training colleges, health care facilities, alongside the recovery of vital water infrastructure mostly in rural area of Syunik province to meet the basic needs of displaced people and host communities and ensure decent living conditions.

The list of suboperations will be determined by the Promoter using a screening methodology approved by the European Investment Bank (EIB). The Promoter will submit the final list of suboperations for the Bank's approval, presented in a predefined format that will be agreed upon during the implementation phase. This submission will include a detailed procurement plan. It is important to note that the list of suboperations is provisional and may be subject to adjustments as the operation progresses.

The following table will outline the types of works primarily targeted within the sectors eligible for this framework facility:

Sector	Activity
Social infrastructure	Health Construction and rehabilitation of public buildings (polyclinics, primary health facilities and ambulatories); Procurement of medical equipment; Recovery and improvement of energy efficiency.
	Education Construction and rehabilitation of public buildings: two TVET colleges in Kapan and Sisian cities Recovery and improvement of energy efficiency.
Water supply systems	Construction, repair and reestablishment of infrastructure for community and rural water supply systems. Recovery and improvement of energy efficiency.

The Credit can also be utilized to finance the appointment of consultants and experts to support the management, co-ordination, monitoring, planning, design and supervision of the Operation

Calendar

The physical implementation and commissioning of all operations should be realised within 5 years from the Date of Effectiveness.

2.14 Water Tariffs

2.14.1 Current fixed component independent from consumption

- Indicate the component that is billed for the provision of service (such as a charge per meter, per connection, per capita, per property) or on any other basis (such as debt repayment fee) and that has nothing to do with the consumption. Do not confuse with lump sum billing (see 2.14.2)
- Where relevant distinguish for water and wastewater and further to categories, such as user groups (domestic, commercial, etc.), meter diameter, etc.
- Indicate the relevant amount(s) with the frequency of billing (monthly, quarterly, yearly, etc.)
- If there is no independent fixed component please indicate "n.a." (not applicable)

2.14.2 Current fixed component for consumption ("lump sum")

- In case there are no customer meters, customers might be billed on the basis of a lump sum. In case only a part of customer is billed that way, please indicate their number or the percentage of total.
- Where relevant distinguish for water and wastewater and further to categories, such as user groups (domestic, commercial, etc.), meter diameter, etc.
- Indicate the relevant amount(s) with the frequency of billing (monthly, quarterly, yearly, etc.)
- If there is no fixed "lump sum" component please indicate "n.a." (not applicable)

- Where relevant distinguish further to categories, such as user groups (domestic, commercial, etc.), volume related tariff groups, etc.
- Please indicate all applicable taxes (such abstraction tax, pollution tax, water fund, etc.)
- Please indicate for all taxes as well as for VAT the calculation basis (such xx UAH/m³ or xx % of A, B or A+B, etc.)
- Indicate the relevant amount(s) and or percentages with the frequency of billing (monthly, quarterly, yearly, etc.)

2.14.4 Tariff evolution

Describe the required and the planned evolution of tariffs over the next few years. In case water infrastructure is created in a village or town where there was no such infrastructure before, the calculation of tariffs required to recover at least the O&M cost given in 2.13 is mandatory.

2.15 Scheme indicators

Please select the relevant indicators.

2.15.1 Water Supply

Capacity of water treatment plant constructed or rehabilitated	m ³ /day
Length of water mains or distribution pipes built or upgraded	km
House connections created or rehabilitated	nr
Population benefiting from safe drinking water	inhabitants
Energy consumption water supply	kWh/m ³
Non-revenue water	%
Service level	%

2.16 Cash Flow of Utility

Provide summary breakdown of budget for the operator (typically the PCE), showing different sources of income and operational and capital expenditure, including for the non-water and sanitation sectors and transfers from/to the municipality. A business plan can also serve for the above purpose. The data should cover ideally the 3 past years plus the 3 coming years (i.e. including the effects of the scheme).

2.17 Economic cost-benefit analysis

For capital investment schemes with a cost of more than EUR 5 million equivalent, the economic viability of the scheme should be demonstrated through an economic cost-benefit analysis covering the construction period plus an operations period of at least 25 years (including estimates of economic rate of return and economic net present value). The projected economic cost and benefit streams should reflect data provided in previous sections. Figures should be in constant prices, and should include details of the various costs and benefits.

2.18 Financial sustainability analysis

For capital investment schemes with a cost of more than EUR 5 million equivalent, the financial sustainability of the scheme should be demonstrated through a cashflow analysis covering the construction period plus an operations period of at least 25 years (including estimates of financial rate of return and financial net present value). The cash flow projections should reflect data provided in previous sections. Figures should be in constant prices, and should include details of the various revenue sources and operational and capital (including replacement) expenditures.

2.19 Affordability analysis

For capital investment schemes with a cost of more than EUR 5 million equivalent, the affordability of water supply and/or wastewater services should be demonstrated by estimating the average water supply and/or wastewater bill of a low-income household in the service area of the operator as a percentage of the expenditure budget of a low-income household, and compare this percentage with the official affordability limit (in case there is no official affordability limit, the internationally accepted limit of 3% applies to water supply services, and 2% to wastewater services).

All assumptions should be clearly stated and justified.

Schedule B

EURIBOR

"EURIBOR" means:

- (a) in respect of a relevant period of less than one month, the Screen Rate (as defined below) for a term of one month;
- (b) in respect of a relevant period of one or more months for which a Screen Rate is available, the applicable Screen Rate for a term for the corresponding number of months; and
- (c) in respect of a relevant period of more than one month for which a Screen Rate is not available, the rate resulting from a linear interpolation by reference to two Screen Rates, one of which is applicable for a period next shorter and the other for a period next longer than the length of the relevant period,

(the period for which the rate is taken or from which the rates are interpolated being the **"Representative Period"**).

For the purposes of paragraphs (a) to (c) above:

- (i) **"available"** means the rates, for given maturities, that are calculated and published by Global Rate Set Systems Ltd (GRSS), or such other service provider selected by the European Money Markets Institute (EMMI), or any successor to that function of EMMI, as determined by the Bank; and
- (ii) **"Screen Rate"** means the rate of interest for deposits in EUR for the relevant period as published at 11:00 a.m., Brussels time, or at a later time acceptable to the Bank on the day (the **"Reset Date"**) which falls 2 (two) Relevant Business Days prior to the first day of the relevant period, on Reuters page EURIBOR 01 or its successor page or, failing which, by any other means of publication chosen for this purpose by the Bank.

If such Screen Rate is not so published, the Bank shall request the principal offices of four major banks in the euro-zone, selected by the Bank, to quote the rate at which EUR deposits in a comparable amount are offered by each of them, as at approximately 11:00 a.m., Brussels time on the Reset Date to prime banks in the euro-zone interbank market for a period equal to the Representative Period. If at least 2 (two) quotations are provided, the rate for that Reset Date will be the arithmetic mean of the quotations. If no sufficient quotations are provided as requested, the rate for that Reset Date will be the arithmetic mean of the rates quoted by major banks in the euro-zone, selected by the Bank, at approximately 11:00 a.m., Brussels time, on the day which falls 2 (two) Relevant Business Days after the Reset Date, for loans in EUR in a comparable amount to leading European banks for a period equal to the Representative Period. The Bank shall inform the Borrower without delay of the quotations received by the Bank.

All percentages resulting from any calculations referred to in this Schedule will be rounded, if necessary, to the nearest one thousandth of a percentage point, with halves being rounded up.

If any of the foregoing provisions becomes inconsistent with provisions adopted under the aegis of EMMI (or any successor to that function of EMMI as determined by the Bank) in respect of EURIBOR, the Bank may by notice to the Borrower amend the provision to bring it into line with such other provisions.

If the Screen Rate becomes permanently unavailable, the EURIBOR replacement rate will be the rate (inclusive of any spreads or adjustments) formally recommended by (i) the working group on euro risk-free rates established by the European Central Bank (ECB), the Financial Services and Markets Authority (FSMA), the European Securities and Markets Authority (ESMA) and the European Commission, or (ii) the European Money Market Institute, as the administrator of EURIBOR, or (iii) the competent authority responsible under Regulation (EU) 2016/1011 for supervising the European Money Market Institute, as the administrator of the

EURIBOR, or (iv) the national competent authorities designated under Regulation (EU) 2016/1011, or (v) the European Central Bank.

If the Screen Rate becomes permanently unavailable and no EURIBOR replacement rate is formally recommended as provided above, EURIBOR shall be the rate (expressed as a percentage rate per annum) which is determined by the Bank to be the all-inclusive cost to the Bank for the funding of the relevant Tranche based upon the then applicable internally generated Bank reference rate or an alternative rate determination method reasonably determined by the Bank.

- (a) the Fixed Rate and/or Spread that would apply to the Tranche, or of its part indicated in the Interest Revision/Conversion Request pursuant to Article 3.1; and

If the Borrower duly accepts in writing a Fixed Rate or a Spread in respect of an Interest Revision/Conversion Proposal, the Borrower shall pay accrued interest on the Interest Revision/Conversion Date and thereafter on the designated Payment Dates.

Prior to the Interest Revision/Conversion Date, the relevant provisions of this Contract and Disbursement Offer and Disbursement Acceptance shall apply to the Tranche in its entirety. From and including the Interest Revision/Conversion Date onwards, the provisions contained in the Interest Revision/Conversion Proposal relating to the new Fixed Rate or Spread shall apply to the Tranche (or any part thereof, as indicated in the Interest Revision/Conversion Request) until the new Interest Revision/Conversion Date, if any, or until the Maturity Date.

C. Partial or no Interest Revision/Conversion

In case of a partial Interest Revision/Conversion, the Borrower will repay, without indemnity, on the Interest Revision/Conversion Date the part of the Tranche that is not covered by the Interest Revision/Conversion Request and which is therefore not subject to the Interest Revision/Conversion.

If the Borrower does not submit an Interest Revision/Conversion Request or does not accept in writing the Interest Revision/Conversion Proposal for the Tranche or if the Parties fail to effect an amendment requested by the Bank pursuant to paragraph A above, the Borrower shall repay the Tranche in full on the Interest Revision/Conversion Date, without indemnity.
